eviXscan DENTICA

DENTICA |

Perfect solution for  
dental labs and technicians

# Why choose eviXscan Dentica?

eviXscan Dentica is the best in joining performance, reliability and accuracy.  
A single solution covering the entire 3D scanning, modeling and designing workflow.

Open and customizable system

Import/Export of standard formats: STL, PLY, OBJ, ASC

Lifetime license

Perpetual license with no additional fee

Updating & maintenance

Regular release of updates and a maintenance program to value the software over the time

Powerful but easy

Perfect for both first-time and experienced users

Manifold mesh

High quality results for 3D printing, milling and laser sintering

Structured light 3D scanner with blue LED light technology for dental restoration.

Full range for scanning all types of dental models, multi dies, impressions and verticulator ensuring accuracy and reliability.

## Specifications

- Plug&Play: PC integrated
- Camera res: 1.3 megapixel
- Accuracy: 15 microns
- Optics: auto-calibration

## Intuitive

User friendly workflow and modern interface

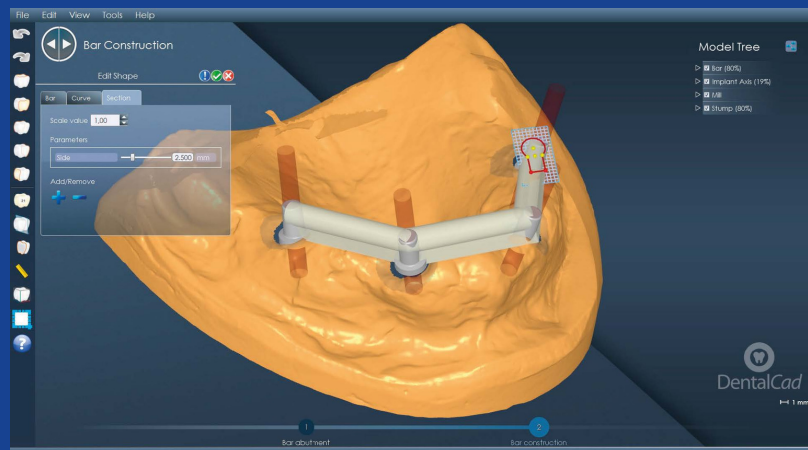

## All in One

Just one license for complete functional coverage

## CAM

Direct integration to manage your CAD and CAM system

The first software for dental modeling designed to support your expertise

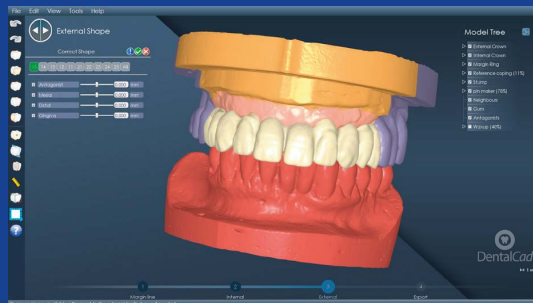

## Job list

- Anatomic Crowns
- Reduced Crowns
- Offset Copings
- Pressed Crowns
- Bars
- Toronto Bridges
- Attachments
- Premilling Jobs
- Inlay - Onlay
- Implants
- Veneers
- Telescopes
- Maryland Bridge
- Bite Bridge
- Wax-up

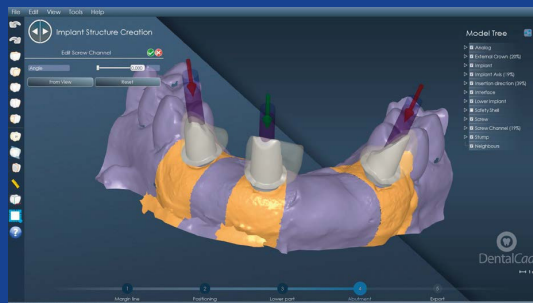

## Powerful

- Complete wax-up management
- Customizable anatomic and implant libraries
- Preset shapes for connectors generation
- Automatic margin line detection
- Mirror management

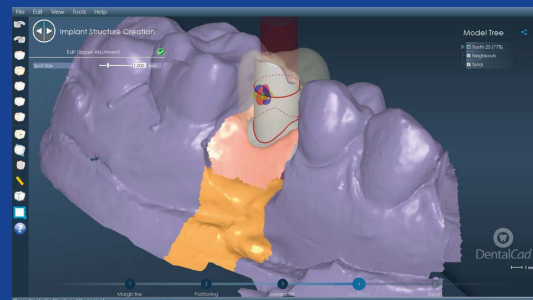

## Easy to use

- Step by step workflow
- Wizard interface
- Autosave

## DSS integration

- Direct import of Digital Smile System projects (libraries, shapes and real measurements)
- Aided 3D modeling with lips references
- Mockup workflow
